Bahar enclosure is a professional manufacturer and supplier of plastic and metal enclosures for electronics, telecommunications, and industrial applications. With years of experience, we offer a wide range of high-quality products including waterproof boxes, desktop cases, wall-mount enclosures, and accessories. Our mission is to provide durable, functional, and customizable solutions to meet the needs of engineers, designers, and businesses worldwide.

## Plastic waterproof enclosures

Plastic waterproof enclosures are designed to protect sensitive electronics from dust, moisture, and harsh environments. Made from durable ABS or polycarbonate material, they are ideal for outdoor and industrial applications where reliable sealing and long-term performance are required.

The screenshot shows a mobile application interface for BAHAR waterproof enclosures. At the top, there is a crown icon. Below it, two product cards are displayed:

- BWP 100 Series:** Features an image of two white enclosures mounted on a brick wall. Below the image are buttons for "online shop" and "more...".
- BWP 102 Series:** Features an image of a white enclosure with a screen and a green enclosure mounted on a brick wall. Below the image are buttons for "online shop" and "more...".

At the bottom of the app interface, there is a navigation bar with icons for a menu, phone, email, LinkedIn, and a globe.

### BWP 100 Series

#### Wall-Mount Waterproof Enclosures

This series, with an IP68 protection rating, provides full protection against dust ingress and excellent resistance to water immersion, making it an ideal choice for outdoor installations, industrial monitoring systems, telecommunications equipment, and marine applications. The waterproof enclosures are made from high-quality, durable plastics, offering exceptional resistance to impact, corrosion, and harsh weather conditions. Compared to the 105 model, which is a desktop enclosure, the 100 series is designed with wall-mounting brackets. Its brackets make it an ideal solution for fixed installation on walls or vertical surfaces.

### BWP 102 Series

**Durable, Lightweight Protection**

The BWP102 from Bahar Enclosure provides durable, lightweight protection for sensitive electronic devices. Its molded gasket and IP-rated waterproof design prevent dust and moisture ingress. Brass screw inserts ensure secure and reliable mounting.

Available in 13 colors with versatile base options—including wall mounting, 180° pipe mounting, and stainless-steel bracket—this enclosure offers flexible installation. Ideal for outdoor sensors, control systems, telecommunications equipment, and junction boxes.

### BWP 103 Series

**Economical Plastic Waterproof Enclosures**

This series of waterproof enclosures offers a more economical option compared to the 102 model, while remaining reliable and durable.

Despite its affordable price, it provides high resistance to dust and moisture ingress, reducing project costs without compromising protection quality. This model features a silicone sealing gasket for secure sealing and comes with self-tapping, crosshead screws.

Its durable plastic construction and easy installation make the BWP-103 a cost-effective, long-lasting solution suitable for outdoor environments and harsh industrial conditions.

### BWP 105 Series

**Resilient Protection for Demanding Environments**

The BWP 105 model extends Bahar Enclosure's commitment to providing reliable protection with its durable plastic waterproof design. Engineered to withstand challenging external conditions, the BWP 105 ensures that your critical electronic assemblies remain sealed against moisture, dust, and corrosive elements. Its construction emphasizes both strength and flexibility, offering an easy-to-customize platform for various mounting and component configurations. Whether deployed in harsh industrial settings, outdoor sensing applications, or utility infrastructure, the BWP 105 delivers a resilient, long-lasting housing solution that maintains operational integrity and extends the lifespan of your valuable electronics. The BWP-100 and BWP-105 are identical in size and material; the BWP-105 simply lacks mounting brackets

## BWP 106 Series

### Maximizing Protection and Longevity

The BWP 106 enclosure stands as a reliable component within the Bahar Enclosure's waterproof line, designed for users who require dependable environmental protection in a compact or specific size variant. Crafted from resilient, non-conductive plastic, this model ensures a secure, high-integrity seal, guarding internal circuitry against full ingress of dust and water, a crucial feature for outdoor installations and demanding industrial automation. The BWP 106 facilitates quick installation and robust defense, serving as a dependable choice for housing sensors, control gear, and connectivity modules in any location where weather resistance is non-negotiable.

### BWP 108 Series

**Ultimate Durability in a Plastic Enclosure**  
The BWP 108 model reinforces Bahar Enclosure's dedication to high-performance protection, delivering a plastic enclosure built for extreme environments. Designed for superior resistance, it provides an airtight and watertight seal essential for safeguarding sensitive electronic and electrical connections. Ideal for applications exposed to constant moisture, dust, and corrosive chemicals, the BWP 108 ensures exceptional longevity and operational consistency. Its lightweight yet durable construction and ample internal space make it the trusted choice for housing complex components in instrumentation, control systems, and outdoor data acquisition units.

### BDH 200 Series

#### ABS Plastic Desktop Enclosures

The BDH 200 Series offers high-quality ABS enclosures designed for desktop and handheld applications. With a modern, ergonomic design and smooth finish, these cases are ideal for measurement instruments, control units, communication devices, and consumer electronics. They provide durability, lightweight construction, and easy customization through machining or printing.

### BDC 300 Series

#### Desktop Plastic Enclosures

The BDC Series is designed for desktop and table-top electronic equipment, offering a sleek, professional appearance with durable ABS construction. These enclosures are ideal for instruments, control systems, test devices, and multimedia units. They feature easy assembly, ventilation options, and customizable panels, making them suitable for a wide range of modern electronic applications.

### BRT 800 Series

#### Industrial control enclosures

The BRT Series is a durable, flame-retardant line of DIN-rail enclosures designed for industrial control applications. Made from fire resistant materials, they offer high safety, reliable performance, and a wide operating temperature range.

Available in multiple sizes with vented or non-vented options, the BRT enclosures provide easy DIN-rail mounting and support customization such as drilling, printing, and color options. Ideal for control cabinets, automation systems, and harsh industrial environments.

## BDA 400 Series

### BDA Series

The BDA Series is a durable line of metal enclosures designed for electronic and industrial applications. Made from iron, aluminum, or metal-plastic combinations, these enclosures offer strong protection, wide operating temperatures, and long-lasting performance.

Available in multiple sizes and front-panel options, the BDA Series supports full customization—such as drilling, CNC machining, and printing—making it ideal for power units, automation systems, and instrumentation projects.

**BAD series**

**Aluminum Extrusion Enclosures**

The BAD Series features high-strength aluminum extrusion housings designed for industrial electronics and control systems. With excellent heat dissipation, mechanical protection, and electromagnetic shielding, these enclosures are ideal for power supplies, automation devices, communication modules, and embedded systems. The modular design allows for custom lengths, anodized finishes, and machining options such as cut-outs or printing, offering both durability and flexibility for advanced applications.

## Handle

The BTS Series is a sturdy handle designed for portable desktop and instrument enclosures, making them easy to carry. Made from high-quality ABS plastic, these handles are ideal for test equipment, medical devices, measuring instruments, and control units. The ergonomic design ensures comfort and ease of use, while the enclosure body supports custom machining, display integration, and labeling according to project requirements.
